

“Mr. Wynn inspired our students to think differently about studying and learning. He made a difference!”

“Many of our students are struggling learners who do not know how to study and do not have at-home academic support. Mr. Wynn engaged students across multiple grade levels in thinking deeply about learning, made the process fun, and taught students how to continuously experiment with different study skills and learning strategies.”

While I have been in education for over 30 years, by observing Mr. Wynn, I learned that there is so much more that we can do to teach students about the plethora of brain-based learning strategies from which to choose. For many of our students, their time with Mr. Wynn was life-changing.”
