

Find out why students love Mr. Wynn's authentic conversations about making career or college choices

“Only about 40% of our students are interested in attending college, but 100% of our students need to pursue a college or career pathway. Mr. Wynn’s authentic conversations inspire students to think about pathways aligned with their gifts, talents, and interests. For many of our students, this was their first time having such a conversation and was literally an epiphany rooted in choices and consequences.”

Presenting each student with an autographed copy of Mr. Wynn’s book allowed us to plant seeds—some of which took root immediately, while others may not take root until weeks, months, or years later. However, we know from surveying our students that for many of them, the seeds are germinating.”
